

# “J-BAR”

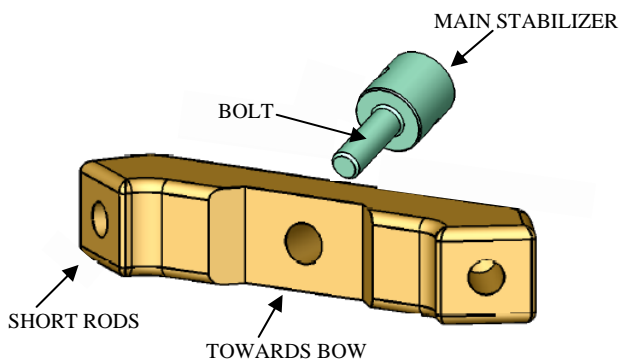

Congratulations on your purchase of the “J-Bar”! This short instruction sheet should give you all the necessary information to achieve the best results with the “J-Bar”.

The “J-Bar” was designed by top shooters for the ultimate in simplicity and durability. There are very few parts and therefore very little to cause trouble by changing during your competition.

To install the “J-Bar” simply insert the stainless attachment bolt through the center whole with the threads of the “J-Bar” to your bow or extender rod so that it is at right angles to your bow. Be sure to tighten the attachment bolt to keep it from moving during shooting.

Attach you main stabilizer rod to the adaptor bolt and your short stabilizer rods to the “J-Bar” on each side.

The “J-Bar” is available in two styles, either flat or with a 17° down angle.
