

MASTER PLUNGER

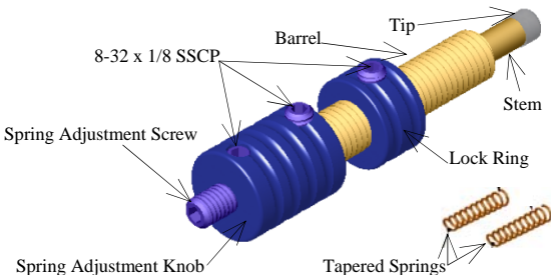

Note: Wrap-around or launcher style rests should use the Master Lok Plunger

The Tone "Master Plunger" has been developed with the top target archers and bowhunters in mind!

The "Master Plunger" offers a stainless steel Teflon lined barrel and a stainless steel stem. It has a replaceable Teflon tip and three sizes of tapered springs for a wide range of adjustments.

INSTRUCTIONS

To set the "Master Plunger", loosen the set screws on the lock ring and adjust the center shot of your arrow. It may be necessary to loosen the spring adjustment knob. Once you reach the desired center shot, tighten the set screw on both the lock ring and the spring adjustment knob. Make all additional tension adjustments with the spring adjustment screw at the rear of the plunger, or by changing the weight of the spring. For additional cushion plunger bow tuning instructions, please contact us.
