

# ULTRA LITE-ELITE TAB

The new Ultra Lite Elite Tab is simply a light weight, less expensive version of our popular Elite Tab. The tab plate is made out of a very durable, light weight polymer. The backing and face are not designed to be replaced as they are attached with rivets to the plate. The plate is threaded for both the finger spacer and ledge, and these items can be purchased as accessories.

The Ultra Lite Elite tab is made with our popular Super Leather Face. This material is impregnated with a waterproofing to help the face stay consistent in all weather conditions.

As with our regular Elite Tab, the Ultra Lite is designed to help the archer be consistent. Start with the string placed against the front of the tab plate with each shot. This gives a consistent starting place for the string. As the archer pulls, the string will move away from the plate slightly but it should be the same each time.

The length of the leather face can be trimmed down as the archer breaks in the tab. The face and backing are made extra long for that purpose.

The Ultra Lite is designed to give years of use for both the beginner and the advanced archer.
