

“ULTRA” BOW SLING

You have purchased the “Ultimate” in bow slings! The “Ultra Sling” has been designed for the demands of the hunter and the IBO shooter. Its very rugged construction, combined with the ultimate adjustment will make this sling perform for years to come.

MOUNTING: The Ultra Sling can be mounted on your bow with the crossbar in the up or down position. Do not slide the rubber on the sling posts all the way until you have decided which way you will mount the sling to your bow. Position the slot in the sling body all the way down before you tighten the hex bolt in place. If you are hunting in cold weather, you can loosen the hex bolt and slide the sling up to accommodate the use of a glove on your bow hand.

The cross bar can be moved right or left to allow room for your bow hand. The sling posts can also be rotated to custom fit the rubber to your hand position on the bow. After a little experimenting you can position this sling very easily for your bow and style of shooting.
