# ELITE TAB FACE MATERIALS

## What is the difference in the Tab Face materials?

### CORDOVAN

Cordovan is premium leather taken from the rump of a horse. It varies in thickness and is remarkably sturdy and durable. It takes a while to break in, but will last longer than any other face.

### SUPER LEATHER

Super Leather is a treated cowhide. It is a little more weather resistant, uniform in thickness and easier to break in, but doesn't last quite as long as Cordovan.

### HAIR

Hair is actual hair-on cowhide. Some archers like it because it is so slick. The problem with hair is that the face wears very quickly because when the string comes off the tab, it pulls out the little hairs.
